

## SCHOOL ZONE

Developing Cities Smarter Than Ever

# SCHOOL ZONE

## SAFE-ZONE

The development of modern cities through safe and smart road networks which form the cornerstone of building smart cities. With the availability of innovative ideas and the right investment of the latest technologies, we provide a sophisticated, safe and intelligent society.

## SAFE-ZONE

The safety of children as they come and go from school must be a priority, this means safer roads and careful driving in school areas. Our solution helps to keep drivers aware of speed limits and control their behaviour in designated areas.

## SAFE-ZONE

- ▶ Integrated system that regulates vehicles' speed on the road in the school area through a system of devices to provide a safe environment for students
- ▶ System with LED screen displays the vehicle speed in real time, showing a different animation face depending on the vehicle speed.
- ▶ Safe-Zone™ System measures the speed of the vehicle in the school area. If the limit is exceeded by the driver, a specialized doppler speed enforcement radar will take photo of the vehicle and generate a violation against it.
